# MOVE TO STABILIZE SOFT COAL INDUSTRY Island Oil, Metropolitan Pet.

Committee Representing Railroads, Engineers and Operators Offers Plans.

SPRING STORAGE URGED

New Seasonal Freight Rate and Electrification of Transportation Proposed in Report

A plan to stabilize the bituminous coal industry by a practicable schedule of peasonal freight rates, spring and sumor storage of coal and the electrificaof coal transportation is outlined in a report made public here yesterday committee of railroad presidents, mining engineers and coal operators. The committee met April 6. The report was prepared under the direction of Flerbert Hoover and contains what are probably the most comprehensive obas made concerning the stabilizaof the industry. Mr. Hoover preed in his capacity as president of the American Institute of Mining and Metalreical Engineers.

The railroads played a prop ment part drawing up the recommendations, it exidented, because of the vital interoy have in the coal industry. The ittee from the American Railroad ation consisted of Samuel Ren, at of the Pennsylvania system; oad; A. T. Dice, president of the delphia and Reading Railroad; E. carson, president of the New York New Haven and Hartford Railroad, and F. Porterfield, representing C. H. rkham, president of the Illinois Cen-

and in order that it may do so the executial associates of production, power oats crop, according to expectation, will and transportation must be provided. The method as outlined, while furnish- by bad weather. Provisions were lower ing adequate power, will automatically serve to greatly facilitate production." The report favors seasonal freight rates, but the committee expressed the belief that the Frelinghuysen bill does not fully cover the case. Mr. Hoover appointed S. A. Taylor, Eugene Mc-Auliffe and E. W. Parker as a committer to go to Washington and appear be-fore the Freylinghuysen committee to offer a substitute bill providing for seaschul freight rates.

The committee, which dealt with the 35 s. ton.

storage of coal as a factor in the sta-bilization of the bituminous coal industry, made a report in which it set forth that the storage of coal was both feasible and necessary. In this connection the report reads:

The storage of coal, as near as possible to the point of ultimate consumption, should be encouraged by all users. torage at the mines is almost always impracticable on account of the usual consestion of the railroads during the winter months when the coal is needed. Practicability of bituminous coal storage beyond a doubt, as it has been done years on a large scale at the docks on the great lakes, in New England, at many industrial and public plants throughout the country, at the Panama hal and at many of the Government bases of sumply,

For the domestic trade the best stor-Sumer, and the people should be en-couraged by every means to purchase 'heir winter's supply as early in the Exceeding spring as possible. So far as omestic consumer is concerned, the t of doing this would be practically us, and if a reduction in price or freight rates is made at this time actically all of it would represent a
